

Anthony Bechara, 12, and William Sheekey, 11, enjoy the Little Makers electronics club.

INNER WEST

Project helps children understand electronics

ELECTRONICS enthusiasts of primary school age have the chance to build their own hardware such as music synthesisers, Mars rovers and more.

The Little Makers Club project, sponsored by ING Direct, is aimed at primary school children from Years 4 to 6.

Using electronics pieces that join together magnetically, so no soldering is required, children are guided through a step-by-step process to gain knowledge and confidence in using electronics.
